

UNITED STATES  
DEPARTMENT OF VETERANS AFFAIRS

**GI Bill**

Ocean Helicopters is approved in for the training of veterans, reservists, and other eligible persons under the provisions of Title 38. US Code.

The Veterans Administration will not pay for the Private Pilot course; this has to be self funded. Once the veteran has achieved a Private Pilot License, the VA will reimburse 60% of the veteran's training costs for approved courses (**if not associated to the Palm Beach State College Course Structure**)

To start the process a veteran needs to find out if they qualify for benefits. The veteran should call the Veterans Administration on 1-888-442-4551.

Depending on the veterans circumstances the following form requires completing and mailed to the VA along with a copy of the veteran's discharge papers (Military Form DD214 - #4). VA Form 22-1990 Application for VA Education Benefits - if this is the first time the veteran has used their benefits

VA Form 22-1995 Request for Change of Program or Place of Training - if the veteran has used their benefits previously

If the veteran does not have the Military Form DD214 - #4 they must obtain this before commencing training.

Once the veteran receives an awards letter from the VA stating the amount of benefits available for use, a copy of this letter is required by Ocean Helicopters to enable us to send an enrolment Certificate to the Veterans Administration.

**Post 9/11 GI Bill**

**100% funding available for qualified veterans under the Post 9/11 GI Bill**

In partnership with Palm Beach State College we have developed a Certificate Programme and an AAS / AS Degree course that provides 100% funding for Veterans qualifying under the Post 9/11 GI Bill.

Training includes Private Pilot Certificate to Certified Flight Instructor Instrument (200 flight hours) and will include advanced courses such as Turbine Transitions.
